

Intermac, Donatoni Macchine, and Montresor at Marmomac 2018: ALL IN ONE power that anyone can afford

Pesaro, 25 June 2018 – Intermac, Donatoni Macchine, and Montresor will participate in the 53rd edition of Marmomac, the largest international trade show dedicated to marble, granite, technology, design, and training that is scheduled to take place in Verona from 26 to 29 September 2018.

Intermac, Donatoni Macchine, and Montresor, together for the first time in one location, will physically represent the "ALL IN ONE" concept which characterises the three brands' communication to express how the union of technological capability and a wide-spread distribution network are capable of providing solutions for the creation of a digitalised factory and 360° customer care service, through a single contact point. The stand will feature work centres, water-jet machines, bridge saws, cutting centres, edge-polishers, finishing systems, and collaborative robotics systems in order to provide operators from the stone and stone engineering sectors a synergy of tailored solutions that can be integrated with one another and that are able to help our clients' businesses evolve to a new dimension.

Technology that anyone can afford

The "ALL IN ONE" strategy is supported by the concepts of intelligent automation and flexible integration of processes applied by the three companies through the use of the latest generation of technology. For the occasion, Intermac has developed a new work centre that will make it possible, through investments that any company can afford, to revolutionise industrial production, ensuring that companies remain competitive and guaranteeing a reduced time-to-market production schedule. The **Master Loader** will also make its début, a flexible robotic cell, designed and created to optimise all loading and unloading times for work centres and water-jet machines.

Montresor, having acquired strength through the visibility generated by sharing space with two large companies like Intermac and Donatoni Macchine, completes the range of products with its own high quality products and solutions which clients will be able to try out and see in action in Verona.

Greater value from machines

Thanks to **SOPHIA**, the new **IOT platform of Intermac services**, the process of factory digitalisation is further made a reality. The new platform, available as of this coming September, provides, in real time and through intuitive dashboards, information and data from machines distributed around the world. This data makes it possible to monitor production, analyse how the machines are functioning, identify malfunctions, assist clients in maintenance operations, order replacement parts in less time, and conduct preventative maintenance.

Diamut, Tooling division

Diamut is ready to demonstrate to all who attend Marmomac 2018, the reality of the technology that it produces daily to anticipate the needs of a constantly evolving market.

The main solutions dedicated to edge-polishing and the machining operation of paving units and funerary art will be presented.

Diamut will also be present at the Intermac stand with an internal Demo Area, which will showcase the workmanship of the tools that are guided by the careful eye of the Biesse Group's stone division machines.

Italian Stone Theatre - Water will animate *The Italian Stone Theatre*, the pavilion dedicated to Italy's high quality lithic sector, which will return to Verona on occasion of Marmomac 2018. The theme for the 2018 edition is **Wellness & Hospitality**, which includes the use of stone materials in the creation of furniture, products, décor, and architectural elements for hospitality and wellness structures. Intermac, for the third year in a row, will participate in the **"Ristorante d'autore"** exhibit, and paired with illustrious names in Italian design will be able to interpret, through its technological superiority, the projects that have been specifically studied, transforming them into artefacts and prototypes capable of expressing the excellence of Made in Italy.

We'll be waiting for you at Marmomac, HALL 5

Intermac is the Biesse Group division that handles the production and sale of equipment and systems for machining glass, stone and metal. Established in Pesaro in 1987 by Giancarlo Selci, it rapidly managed to achieve a leadership position in the sectors it operates in and has earned the trust of successful companies that operate in a variety of industrial sectors, from construction to interior design and from the automotive to the aviation industry. Through a vast and extensive distribution network of branches, dealers and agents, Intermac offers attentive, personalised assistance to customers, from pre-sales consultation to after-sales and spare parts services. The majority of the brand's manufacturing activities take place at the Intermac plant in Pesaro, where the company's production area spans around 30,000 square metres, employing more than 300 staff. In addition, the company also has a further site in Dongguan (China).

Donatoni Macchine. The company was founded 50 years ago in Domegliara, near Verona, an area recognised worldwide as one of the key centres for stone machining. The quality and reliability of the products that the company produces have enabled Donatoni Macchine to establish a presence on the majority of foreign markets, thanks to a highly-efficient commercial network and consistent attendance at the major international trade fairs and events. From Europe to the United States, from South America to North Africa and from the Arab to Asian markets, Donatoni Macchine is synonymous with innovation and precision.

Montresor & C. s.r.l. Since the sixties, the company, which is based in Villafranca (VR), has been producing, marketing and installing edge-polishing machines for finishing marble, granite, porcelain and synthetic materials. The extremely high levels of specialist knowledge acquired over the years coupled with a continuous focus on technological research have made the Montresor brand synonymous with excellence among manufacturers of edge-polishing machines.

BIESSE S.p.A. - Biesse Group is a global leader in wood, glass, stone, plastic, and metal processing technology. It designs, manufactures, and distributes machines, integrated systems, and software for manufacturers of furniture, door/window frames, and components for the construction, ship-building, and aerospace industries. It invests an average of 14 million Euro per year in R&D, boasting over 200 registered patents. It operates through 9 industrial sites, 37 branches, and 300 agents and selected dealers, exporting 90% of its production. Its customers include some of the most prestigious names in Italian and international design. Founded in Pesaro in 1969 by Giancarlo Selci, Biesse SpA has been listed in the STAR segment of the Italian Stock Exchange since June 2001, and is currently included in the FTSE IT Mid Cap index. It currently has 3800 employees worldwide.
